**LEO2 SAP Leonardo IoT for the IntelligentEnterprise**

Access granted with SAP Learning Hub for anytime learning
Goals
• This course will prepare you to:
  – Describe the Full stack of IoT solutions and technologies
  – Understand the Building blocks of SAP Leonardo Internet of Things (IoT)
  – Understand the cloud-based Core Services of SAP Leonardo Foundation.
  – Understand the Internet of Things Gateway.
  – Understand and learn to use the IoT cockpit

Audience
• Application Consultant
• Business Process Architect
• Developer
• Developer Consultant
• Enterprise Architect
• Program / Project Manager
• Solution Architect
• System Architect
• Technology Consultant

Prerequisites
Essential
• None

Recommended
• None

Course based on software release
• SAP Cloud Platform
• IOT Cockpit
• SAP CPI Tenant
• Trainingslandscape with SAP Gateway Edge

Content
• Introduction
  – The Intelligent Enterprise
  – SAP Leonardo
  – SAP Leonardo Internet of Things Overview
• SAP Cloud Platform Internet of Things Service
  – IoT Service Onboarding
  – IoT Service Cockpit
• Device Management
  – Device Model
  – Security
• API Service
  – Create a Device Model with the Internet of Things
• Internet of Things Gateway
  – IoT Edge Platform
  – IoT Gateway Cloud
  – IoT Service SDK
IOT100 SAP Leonardo - Internet of Things Fundamentals (Contd...)

- SAP IoT Application Enablement
  - Introduction and Onboarding
  - Thing Access and Tenant Administration
  - Configuring SAP Web IDE for IoT Application Enablement
- Processing Data Using SAP Cloud Platform Services
  - SAP Cloud Platform Integration
  - SAP Cloud Platform Business Rules
  - SAP Business HUB additional services

CP100 SAP Cloud Platform

Goals
- This course will prepare you to:
  - Understand the SAP Cloud Solution
  - Understand the SAP Cloud Strategy
  - Understand Java Development
  - Understand development in SAP Cloud
  - Classify and use the various Cloud Platform services
  - Understand the various CP Services
  - Explore the Internet of things
  - Get an overview of SAP Cloud Platform, integration Service
  - Understand Extensions of SAP Cloud Solutions

Audience
- Application Consultant
- Business Analyst
- Business Process Architect
- Business Process Owner/Team Lead/Power User
- Developer
- Development Consultant
- Program/Project Manager
- Solution Architect
- Technology Consultant

Prerequisites
Essential
- None

Recommended
- CLD100

Course based on software release
- CP trial
Content

• SAP Cloud Platform, Introduction
  – Introduce SAP Cloud Platform (SAP CP)
  – Explain Landscape Architecture-Relevant Terms
  – Learn about typical Use cases
  – Explore What is in it: Product Capabilities and Services

• Platform Concepts
  – Understand Basic Platform Concepts
  – Explore Datacenters
  – Understand Security

• Digital Transformation - Java Development
  – Introduce Digital Transformation, Java Development
  – Explore 12 Factor Microservices
  – Use the Supported Java Development Environment
  – Explain Supported Java Programming Models by CF
  – Operate Java Applications on SAP Cloud Platform NEO

• Digital Transformation – SAP HANA Development
  – Understand SAP HANA Development
  – Understand the SAP HANA XSA Development on CF

• Digital Transformation – HTML5/SAPUI5/Fiori Development
  – Introduce HTML5, SAPUI5, and Fiori Development
  – Use SAP UI5
  – Use SAP Fiori

• Agile Business – Extend Application
  – Introduce Agile Business
  – Understand the Application Frontend
  – X-tend the Application: Backend
  – Explore SAP Cloud Platform Data and Storage Services

• Enterprise Optimization – Integration Services
  – Introduce Enterprise Optimization, Integration Services
  – Explore Available Integration Services

• Enterprise Optimization – Process Integration
  – Introduce SAP Cloud Platform, Integration Service
  – Implement iFlows

• Enterprise Optimization – API
  – Explain API Management
  – Build and Publish APIs

• Internet of Things Services (IoT)
  – Explore the Internet of Things (IoT)

• Other Interesting Services and Features
  – Explain SAP Cloud Platform SaaS Extensions
  – Explore SAP Cloud Platform Business Services
  – Explain Cloud Platform Data and Storage
  – Understand SAP Cloud Platform Security

Notes

• To ensure success, SAP recommends combining education courses and hands-on experience to prepare for certification exam C_CP_11 - SAP Certified Development Associate SAP Cloud Platform, as questions will test your ability to apply the knowledge you have gained in training CP100. This certification has to be booked separately.
ML1 Enterprise Machine Learning in a Nutshell
Access granted with SAP Learning Hub for anytime learning

ML2 Enterprise Deep Learning with TensorFlow
Access granted with SAP Learning Hub for anytime learning

MLF01 Using SAP Leonardo machine learning foundation business and functional services
Access granted with SAP Learning Hub for anytime learning

MLF02 Building ML-enabled apps with SAP Leonardo machine learning foundation and TensorFlow
Access granted with SAP Learning Hub for anytime learning

MLF03 Getting Started with SAP Leonardo Machine Learning Foundation
Access granted with SAP Learning Hub for anytime learning
